Cartel de seguridad

The Life Line over Standard Poles of GM is designed to be installed in all types of roofs and surfaces, providing multiple solutions, and has been certified as conform to the requirements of EN 795 type C, being subjected to a minimum load of 15 kN in all directions in which it would be applied the force in case of fall and exceeding satisfactorily all the required criteria.

### Sistema de Trazabilidad Rápido (S.T.R.)

The **Sistema de Trazabilidad Rápido (S.T.R.)** allows you to visualize on your smartphone or tablet information related to the Life Line installed through the scanning of a QR code. Each anchor device is equipped with an identification plaque and label, through which the user can access the web application developed by GM.

1

Instala la placa S.T.R que GM suministra con cada Línea de vida

2

Escanea el QR asignado con un dispositivo electrónico

3

Lleva tus revisiones al día de manera cómoda, como y cuándo quieras
